

Compass

Report Measure List CO2 Performance Ladder 2023

Global measurement

CO ₂ emissions, scope 1 and 2		134 tons
Revenue	0 million euros	Inf tons/million euros
Staff members	31.9 FTE	4.201 tons/FTE

Overview of measures

Material use / Scope 3

Development of additional reduction measures Global measure		
Categorie A	The company can demonstrate that it has implemented and arranged financing for measures that further reduce carbon emissions in one or several of its projects.	Implemented on 01/2018 Bij projecten van Rijkswaterstaat stellen wij versoberingsmaatregelen voor zoals het niet vervangen van voedingskabels en lichtmasten als deze nog aantoonbaar goed zijn.

Offices

Accredited Measures for energy saving in offices Increasing the efficiency of the activity		
Categorie A	All Accredited Measures for energy saving in offices have been implemented, in so far as indicated in that list. Measures are implemented at natural times	Implemented on 05/2016

Improvement of the energy label of offices Global measure		
Categorie B	Offices have an average energy label of at least A.	Implemented on 01/2023 Haastrecht kantoor gecertificeerd met energielabel A++

Make charge points available for electric vehicles. Electrification		
Categorie C	Minimally 1 charge point per 10 parking spaces + active role in optimising energy management for office/electrical grid	Implemented on 07/2022 Bij Compass beschikking wij sinds 2017 over 5 laadpalen op de 12 parkeerplaatsen en zijn in 2021 zonnepanelen aangelegd waarmee zonne-energie wordt benut om te laden. In september 2023 beschikt Compass over 7 laadpunten in Rotterdam, dit wordt tegen einde jaar nog uitgebreid naar 11. In Haastrecht heeft Compass 6 laadpunten op 6 parkeerplaatsen.

Purchase of green power and/or power made greener with GOs. Renewable energy		
Categorie B	Over 98% of the electricity consumed is green power or power made greener with national GOs.	Implemented on 01/2019 Voor zowel onze locatie in Rotterdam en in Haastrecht kopen wij Groene Stroom in. Dit is ook de standaard voor eventueel nieuwe energie contracten.

Renewable electricity generation (in-house) Renewable energy		
Categorie C	At least 50% of the electricity used is met by renewable electricity generated in-house (through own investment or a lease).	Implemented on 01/2022 In 2021 zijn op onze eigen panden in Rotterdam en Haastrecht zonnepanelen geïnstalleerd.

Organizational policy general

Awareness of carbon emissions among staff Global measure		
Categorie B	CO ₂ reduction is demonstrably addressed in the induction process for over 50% of new consultants and project leaders	Implemented on 06/2021

Implementation of energy saving measures

Global measure

Categorie A	The company structurally implements all scope 1 and 2 energy saving measures that have a payback time of less than 5 years.	Implemented on 01/2018
-------------	---	------------------------

Use of carbon certificates in subcontractor and/or supplier selection

Global measure

Categorie A	The selection process for subcontractors and/or suppliers takes account of the fact whether subcontractors and/or suppliers possess a carbon certificate.	Implemented on 06/2015
-------------	---	------------------------

People mobility

Check correct tyre pressure of cars made available by the organizations

Increasing the efficiency of the activity

Categorie A	Annual tyre pressure check for over 50% of the cars made available by the organizations	Implemented on 01/2019 Doordat meer dan 50% van de auto's elk jaar 2x een bandenwissel hebben ivm met beschikbaar gestelde winterbanden, wordt dit twee keer per jaar automatisch gecontroleerd.
-------------	---	---

Personal mobility competition

Global measure

Categorie B	At least once a year, the company organises an awareness campaign about to foster energy-efficient driving.	Implemented on 01/2014 Uit eigen beweging zijn we onze zuinig rijden competitie gestart. Hierbij maken wij gebruik van een fteedlogic systeem waarmee online data wordt verzameld en dagelijks met berijders wordt gedeeld.
-------------	---	--

Promoting efficient driving: 'Het Nieuwe Rijden'

Increasing the efficiency of the activity

Categorie A	Provision of fuel-efficient driving toolbox to all drivers	Implemented on 12/2015
-------------	--	------------------------

Promoting efficient driving: Monitoring

Increasing the efficiency of the activity

Categorie B	Black box with direct feedback to the driver.	Implemented on 01/2023 Al jaren heeft Compass de veiligrijden competitie. Met behulp van een tracker worden rijgegevens verzameld en maandelijks gepubliceerd. Zuinig en veilig rijden worden zo aangemoedigd.
-------------	---	---

Use of renewable fuel to replace fossil fuel

Renewable energy

Categorie A	It can be shown that between 10% and 20% of the fuel used is renewable fuel	Planned for 03/2024 December '23 - 1 auto op HVO. 1e kwartaal '24 streven om uit te breiden naar een 2e auto. Momenteel onderzoeken we welke chauffeur hier logistiek gezien (tankpunten zijn nog beperkt) het best voor in aanmerking komt.
-------------	---	---

Zero emission vehicles

Electrification

Categorie C	15% of the fleet (passenger and commercial vehicles, owned or leased) consists of zero emission vehicles. Upon expiry of the lease contract or a with a new purchase, a zero CO2 emission vehicle is always ordered	Implemented on 02/2023 Momenteel is bijna 40% van ons NL wagenpark elektrisch. Elke nieuwe auto die erin komt is elektrisch.
-------------	---	---

Subcontractors and suppliers

No measures have been taken for this activity.

Waste

Implementation of the sale of secondary materials

Global measure

Categorie C	The company meets annually with both downstream and upstream chain partners for these secondary materials, in order to discuss improvement in the quality of the material with a view to upcycling.	Implemented on 07/2022 Samen met Dura Vermeer en Hoeflake is Compass Lightcycle gestart. Een initiatief om verwijderde lichtmasten te verzamelen, te inspecteren, testen, certificeren en weer opnieuw in te zetten. A16 Lightbox - initiatief ism Lloyd Industrials waarin oude snelwegarmaturen redesigned worden tot armaturen met een herbestemming in de particuliere markt, horeca, kantoren.
-------------	---	--

Insight into CO2 avoided as a result of the processing of waste streams

Global measure

Categorie C	The company improves its insight into chain emissions avoided by demonstrably producing annual reports that provide greater detail regarding elements of the most important chains. It does this by, for example, using emission factors based on own measurements or specific emission factors reported by chain partners.	Planned for 12/2023
-------------	---	---------------------

Not selected activities

The following activities have not been selected: Hydraulic engineering ships, Equipment, Logistics & transport, Construction site, Advice, Business halls and areas, ICT services, Procurement, Business processes, Green maintenance.
